LETTER OF TRANSMITTAL

*To His Excellency, Honorable Clyde R. Hoey,
Governor of North Carolina,
Raleigh, N. C.*

SIR:

As chairman of the board of directors and in conformity to the law, I have the honor of submitting to you herewith the biennial report of the superintendent, of operations and progress of the State Home and Industrial School for Girls, for the period ending June 30th, 1938.

Respectfully submitted,

W. A. STANBURY,

Chairman Board of Directors.

REPORT OF SUPERINTENDENT

Biennium July 1st, 1936 through June 30th, 1938

In submitting this report it is our desire to touch only on those points which show progress in the efforts to educate and direct the 220 children who have been committed to the school during this period covered by the report; and to show briefly and clearly how the funds have been used toward maintaining and improving facilities to carry forward the work by more modern and progressive methods.

SCHOOL

Miss Daisy Young, principal of the school, submits this report of the school for the year just ended. "There were 207 girls enrolled in classes: 24 of these were enrolled in the academic division and 183 in the vocational division. The teachers for this session were as follows:

Miss Blanche Irwin—academic classwork.
 Miss Katie Sugg—academic classwork.
 Miss Margaret Stallings—health & physical education.
 Miss Maude Moore—activity classwork.
 Miss Daisy Magee—character education.
 Miss Carolyn Flickenger—homemaking.
 Miss Estelle Denton—cooking.

The following workers have helped with the practice in vocational school and have done some of the instruction in their field.

Mrs. F. W. McGinnis—sewing.
 Miss Edith Markham—laundry.
 Miss Edna Tillman, R. N.—home nursing.
 Miss Mary Shepard—personal hygiene and simplified beauty culture.
 Mrs. S. P. Smith—gardening.

There were nine courses offered in the vocational school here at Samarcand:

Character education	Charm
Physical education	Homemaking
Cooking	Laundry
Kitchen supervision	Sewing
Canning (given during the summer months)	

To receive a Vocational School certificate, a girl must complete at least five of these courses. This year there will be 47 certificates awarded at the graduation exercises on May 6. Besides these 47 girls, there are fourteen who have been paroled since last May day who had completed, before going out, the necessary number of courses to make them entitled to a certificate. These certificates will be mailed to the fourteen girls.

This year the Dalton Plan of instruction was installed for the academic classes. Miss Blanche Irwin, our one full time teacher in academic school has made the following report of the work done with this plan and of its success.

"In order that, with a limited number of teachers, we might be able to teach girls coming in at all times of the year and ranging from the fourth through the eighth grade, we adopted the Dalton Plan. By this method the girls of the segregated medical group were also enabled to keep up their school work without interruption.

"In accordance with this plan each girl, when she entered school, was given a carefully planned type-written assignment of the work for the first month. The teachers were not to hold any formal classes, but were to be ready at all times to give any help asked for. As soon as a girl finished an assignment in any subject, she was given a test on that subject. When she had passed tests on all her subjects, she was to be given the assignments for the next month.

"This plan went into effect at the beginning of our school year in September. Since that time we have enrolled eleven in the eighth, four in the seventh, six in the sixth, one in the fifth, and two in the fourth grade—twenty-four in all. Nineteen of these had been in school long enough to attempt the Stanford Achievement tests given in April. Sixteen passed these tests, some having made much more than a year's progress as shown by the tests. Of the three who failed, two were poorly prepared so that their ability to pass was doubtful from the first.

"We feel that the Dalton Plan has been very satisfactory, and we attribute its success largely to the careful grade placements made by the means of intelligence tests and achievement tests."

Miss Irwin in cooperation with Miss Sugg has done a splendid

piece of work with this new plan. Much credit is due Miss Irwin and Miss Sugg for the success of the plan.

The girls who are receiving certificates of promotion to high school have completed satisfactorily the first seven grades of school as prescribed by the State Department of Public Instruction. These girls are ready for admission to high school in any school in the state. There are four of them in number.

PHYSICAL EDUCATION

Miss Margaret Stallings has handled the physical education and recreational activities on the campus, and the following is her report of progress:

"All girls given 45 minutes daily physical education period during the school year; 45 minutes daily swimming period during the summer. Each girl given anthropometric-orthopedic examination twice a year, corrective exercises given to those needing them.

"Lake drained and cleaned out before swimming season, new diving board installed. Water tested by State Department of Hygiene. Advanced swimmers given instruction in Junior Red Cross Life Saving.

Activities:

Birthday parties each month.

Picnics at the lake during summer.

Square dance once a month for honor girls.

Trips to Southern Pines to movies through courtesy of Mr. Chas. Piquet, manager Carolina Theatre.

Special holiday festivities.

Tennis court for staff completed."

MEDICAL

Dr. J. P. Bowen has continued work during this biennium. He gives careful and devoted attention to duty, and results are particularly gratifying. Our large family of children in the early 'teen age are relatively free from colds, and show rapid gains in general health after admission. This must be attributed much to the wise guidance and careful attention to correction of physical defects and a well balanced dietary. Removal of bad tonsils, early detection of cardiac symptoms and chest conditions,

loss of weight: all these minor warning signs are carefully noted and attention given. Miss Tillman, resident nurse, very ably assists in the health program, and carries on daily instruction on health topics, which have a definite carry over value in the child's future.

EUGENICAL STERILIZATIONS

Sterilization papers sent out in 1934	28	
Of this number—Sterilized	23	82%
Not sterilized	5	
Sterilization papers sent out in 1935	52

Not sterilized	10	
Sterilization papers sent out in 1937	46	
Of this number—Sterilized	38	83%
Not sterilized	8	
Total cases requested	164	
Total cases operation performed	127	
Percent operation performed		78%

PROGRESS ON CARE & UPKEEP OF THE PHYSICAL PLANT

Mr. J. P. Penny, engineer, and Mr. Sam Smith, maintenance foreman, have both proven exceptional skill in salvaging materials from the old buildings which have been torn down and making use of them in reconstruction during this biennium. The following report calls attention to the major projects which these men have carried out in addition to their regular duties, as engineer and maintenance foreman. There has been much accomplished with the funds, appropriated by the last session of the legislature, towards renovating the buildings, and putting the electrical lines, water supply, sewerage, plumbing, and equipment into better shape.

Permanent improvements have added the following:

Sweet potato house—completed.

Machinery shed—completed.

Central storage house—now under construction; not completed.

Negotiations for purchase of land are now under way.

Deep well—completed and satisfactory supply of water is now being provided to date.

Current repairs include:

Renovation of old cannery building and equipment.

Two old bridges replaced with new.

Renovation of two repair shops.

Repaired entrance steps to Administration Building with new concrete.

Old Chalet dormitory was condemned for use and was torn down and old materials salvaged for use in current repairs.

Screened garbage collecting house built of salvaged materials.

Under landscaping—much grading, and laying of drain pipe has been done at seven buildings on the campus, and shrubbery and trees planted.

Plumbing renovations have been done at Dairyman's Cottage, Tufts, Ireland, Page, Falconer, and Carroll Cottages. Renovation of drinking fountains at the barns, piggery, and bull pen.

Renewed the entire ironing circuit in the laundry. Rewired the mule barns and checked over and repaired lighting circuits throughout the dairy barns.

Wired garage at Superintendent's house.

Rebuilt power line to take care of new pump station at the deep well.

Completed line and wired the new brooder colonies.

Cleaned out and renovated heating lines at Little Manor, Tufts Hall, shops, and Falconer Cottage.

Replaced ice units and rebuilt chambers at the ice plant.

The terra cotta sewer lines have been broken by tree roots and 537 hours of time of repair force have been used in clean-out work from this cause only. We therefore hope that this item for replacement with cast iron pipe will be made available this year by P.W.A. grant.

Three cold frames have been built. Several flower trellises have been built and set up.

Repairs to roofs under sheet metal contractor. Shingles replaced, metal gutters replaced, repaired and painted, flashings about chimneys and dormers renovated and roofs put in good condition on following:

Carroll	Tufts
Gardner	Ireland
Bickett	Little Manor

Other small items done by sheet metal worker.

Chapel floor repaired and replacement of sills and foundation at entrance, damaged by termites.

Hay barn braced and anchored. Silo straightened and anchored.

Two trailers built for daily hauling of stable manure.

Furniture repaired and painted:

Suites	14	School seats	5
Dressers	43	Beds	4
Small tables	60	Desks	1
Chairs	483	Refrigerators	1

Mattresses renovated like new 85
 Window shades replaced—Total 104.
 Replaced completely at Carroll Hall, Everett, and Morrison.

ADDITIONS AND BETTERMENTS

- (1) Roof repairs & replacements as follows:
 Chapel—complete new fireproof roof and drain pipes and tile, provided to carry roof water away from the building.
 Everett Hall—complete new fireproof room and drain pipes provided.
 Little Manor—porch roof painted (two coats).
 Lounging shed at dairy—complete new metal roof applied.
- (2) Renovation of piggery & poultry houses.
 Old hog house torn down and materials salvaged and used.
 Piggery:
 6 complete new hay racks
 6 self feeders
 5 brooder houses
 6 garbage platforms
 3 shade shelters
 8 portable sheds

 6,600 feet of fencing built, making eight separate ranges, so divided as to separate each group and allow for constant grazing pasture.

 Poultry units:
 4 brooder houses of salvage lumber.
- (3) Sewage disposal plant has been completed under contract job and is now satisfactorily in operation.
- (4) Bull pen and maternity pens—by maintenance force.
 Exercise yards rebuilt.
 New metal roof laid.
 Repairs to floors & walls & ratproofing of feed room.
 Exterior painted.
- (5) Painting progress—by maintenance force.
 Morrison Hall—Interior repaired & painted.
 Page Hall—Interior repaired & painted.
 Everett Hall—Interior repaired & painted.
 Carroll Hall—Interior repaired & painted.
 Tufts Hall—Interior repaired and painted.
 Dairyman's Cottage—Interior repaired and painted.
 Falconer Cottage—Interior repaired and painted.
 Little Manor—Second floor repaired and painted.
 Painting of exteriors of cottages will be continued with funds available from current year's funds.

RECOMMENDATIONS

1. That consideration in salaries be given to increase our school year to nine months' term. Physical education teacher and dressmaking instructor to twelve months.

2. That our visiting physician be given a substantial increase in order to retain his services.

3. That milk rooms be renovated and new equipment be installed, in order to assure grade A milk for the children under our care.

Respectfully submitted,

GRACE M. ROBSON, *Superintendent.*
